

PERSONNEL TIME AND ATTENDANCE PACKAGE

Installation, training and use

Are you looking for a personnel management suite that features an integrated Web desktop and meets the following requirements?

- Compact, economical and efficient
- Easy to use ,
- Flexible integration capabilities
- Classic multi-user solution

Your introductory package

We offer a lean standard solution that can be fully implemented in two days. This includes the business process, entry of employee attendance times at time recording terminals and wage data processing. Depending on your business process, employee attendance times can also be entered with reference to a project or order.

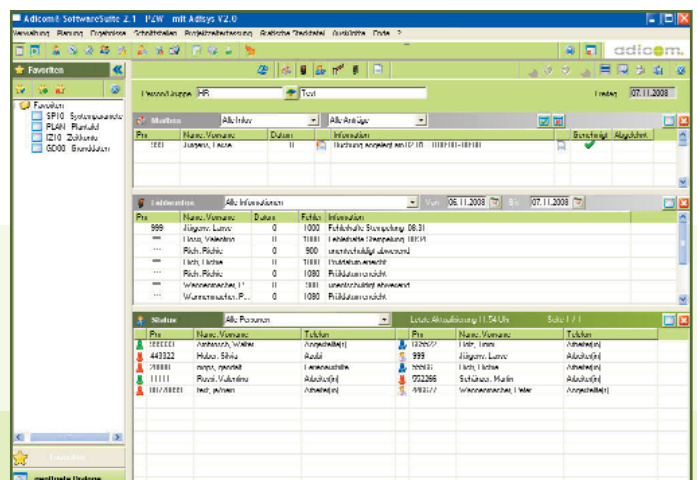

Standard package includes:

- License for Personnel Time and Attendance and Web client for 250 employees
- License for 2 time managers
- Standardized payroll interface in file format
- 250 IDs/key chains (contactless)
- Installation and training

16.900,- € Package price

Functions at a glance

- Graphical planning chart for absence planning and vacation approval
- Time account, monthly view for revisions to postings and display of calculated results (time accounts and extra pay)
- Workflow-oriented notification and approval concept for vacation planning and revisions to postings
- Display of time accounts and vacation budgets
- Event-based quick processing dialog for time corrections and project time management
- Employee time ledger
- Annual absence view

Your advantage

To give you a competitive edge, our strategy is based on optimized personnel scheduling as well as effective cross-industry personnel time management.

- State-of-the-art time modeling and design for your shifts and work schedules
- Automated determination of extra pay and up-to-date results
- A wide variety of working hour variants such as fixed time or flexitime
- Analyses based on your pay scale regulations
